4-H GROWS HERE

HESSE-EARL YOUTH FISHING PROGRAM

MAY 4, 11, 18

This is a free program for youth, ages 5-16, where they can learn basic fishing skills such as casting, knot tying, and more. Then the kids get to apply those skills at a local fishing site in the Lansing area with the assistance of trained volunteers.

Raise a puppy. Change a life.

By being a volunteer puppy raiser, you and your family create life-changing moments, while helping a person who is blind or visually impaired regain independence.

WHAT DOES A PUPPY RAISER DO?

- > Devote 12-15 months of your time, energy and love to raising a puppy
- > Provide daily care, such as feeding and walking
- > Teach basic commands based on Leader Dog guidelines
- > Introduce the puppy to a variety of people and environments
- > Receive tons of ongoing support from Leader Dogs for the Blind

There are multiple puppy raising options to fit your lifestyle.

ONE HOUSEHOLD

This traditional way to puppy raise is perfect for families, college students, active singles, retired couples and empty nesters.

CO-RAISING (PRIMARY AND SECONDARY RAISER)

This option is for someone who wants to share duties with a person from another household.

PASS-ALONG

One raiser has the puppy for the first six months and a second raiser has the puppy for the next six months.

- > Ideal for people who can commit only to a limited time raising a puppy
- > Individuals with pet weight/size restrictions or who may be more comfortable handling a younger, lighter dog can raise for the first six months, while individuals who prefer a dog that already has foundational behaviors may prefer raising the last six months.

CAMPUS PUPPIES

For college students raising on campuses approved by Leader Dog.

- > Must participate in campus puppy club and meet with assigned puppy counselor
- > All supplies, veterinary care and food paid by Leader Dog

To get more information, scan this QR code or visit LeaderDog.org and click on Volunteer.

STATEWIDE CALENDAR OF EVENTS

Livestock and poultry owners encouraged to heighten biosecurity

Recently, highly pathogenic avian influenza (HPAI) has been detected in cattle, cats and commercial poultry flocks across the country and Michigan. MSU Extension and its state partners are continuing to monitor the situation and providing outreach to help mitigate the spread of HPAI. Livestock and poultry owners are strongly encouraged to take proactive measures to defend against additional outbreaks in Michigan. Check out the following resources helpful information on biosecurity:

STATEWIDE 4-H NEWS

Michigan 4-H Foundation opens 2024-25 grant cycle

Awarded annually, the Michigan 4-H Foundation recently opened their grant and award opportunities for the 2024-2025 season. Open to 4-H volunteer leaders, members and staff, the grants and awards support local 4-H clubs and county programs, as well as recognize members of the 4-H community. **All applications are due June 1.**

Opportunities include:

- **Michigan 4-H Legacy Grants of \$1,000.** These grants are awarded to support development of a new program or initiative or to strengthen, enhance or expand a current program that is making a difference.
- **4-H On-Target Grants of \$500.** These grants support 4-H Shooting Sports programs to enhance existing programs, develop a new program or offer a special experience related to 4-H Shooting Sports.
- **The Collins 4-H Youth Horticulture Grant of \$500.** This grant is available only to 4-H youth clubs and supports advancement of club work in plant science and horticulture activities.
- **4-H Educational Garden Grants of \$1,000.** These grants support the creation of local 4-H educational gardens in Michigan.
- **Michigan Farm Bureau 4-H Excellence in Agriculture Award (includes \$1,000 grant).** This award recognizes outstanding 4-H agricultural volunteers that have exhibited excellence in 4-H youth education and leadership development.

Learn more or apply online at <http://mi4hfdtn.org/grants>. Questions? Contact the Michigan 4-H Foundation at 517-353-6692.

Tips for purchasing and bringing home livestock

Adapted from: www.canr.msu.edu/resources/tips-for-purchasing-and-bringing-home-livestock

Acquiring new stock is exciting whether you are building your herd or flock or purchasing your annual 4-H project. These tips will help manage their health and safety by making sure you know what to ask before purchasing and how to prepare to bring livestock home.

Assessing Animal Health and Treatment Documentation

When purchasing animals, you should know their history. Ask the following questions:

- When was the animal born?
- What specific vaccinations has the animal been given and when were they given?
- If necessary, was the animal properly castrated and what method was used?
- Have any other treatments been administered to the animal? If so, what is the slaughter withdrawal for the drugs given?
- Have any of the animals on the farm been ill or shown symptoms of illness?
- If acquiring a market animal, what is the approximate weight?

Considerations as You Bring Animals Home

Transporting. Secure a trailer. If you do not own a trailer, make arrangements with someone who can transport animals for you. Be prepared to pay someone to provide transportation, as a courtesy.

Unloading. Make sure that your facility is ready to house your new animals before they arrive. Have a pen identified for new animals to go into with fresh water and appropriate feed. (Feed should be similar to their previous diet; changing to a new diet should be done over a period of time.) Have a clear and direct path to the animals' new pen from the trailer. Make sure that all gates are open or closed, as appropriate, and secured.

Settling in. Isolate or separate new animals for a minimum of 14 days. At minimum, try to avoid nose-to-nose contact, and comingling feeding and watering. Minimize stress on new animals during the isolation period. If after 14 days, the newly acquired animals have not shown any symptoms of illness, it should be safe to comingling them into your existing herd or flock.

Comingling. Since each species has a social hierarchy, observe animals during comingling and separate if there is risk of injury. Over the course of a day, the herd or flock should settle into a routine that includes the new animals.
