## SCREENING FOR HERBICIDE-RESISTANT WEEDS

- Mature, high quality seed is required no later than mid-November. Please refer to "[Tips for collecting weed seeds](#)" on our website for collection details. The screening process takes 2-4 months to complete.
- Courtesy of the MI Soybean Promotion Committee (MSPC), MI soybean growers qualify for free testing of: Palmer amaranth, waterhemp, horseweed/marestail, common lambsquarters, common & giant ragweed.
- Screening of weeds from crop rotations not including soybeans is available for \$90/sample (\$180 out-of-state). Consult with Dr. Hill ([hill12@msu.edu](mailto:hill12@msu.edu)) if you are interested in screening a species other than those listed above.
