A. 50% B. 60% C. 70% 9. Rabbits will eat more feed during temperatures. A. Warmer E. Colder 10. is a written chart of the ancestors of a rabbit. 11. The longer, coarser hairs that extend above the undercoat are called. A. Crimp hair B. Guard hairs 12. Rabbits with this condition will have their head thrown back with open mouth breathing A. Coccidiosis B. Ear canker C. Heat Stress 13. Most of the digestion process takes place in the A. Small intestine B. Stomach C. Large intestine	
A. 50% B. 60% C. 70% 9. Rabbits will eat more feed during temperatures. A. Warmer E. Colder 10. is a written chart of the ancestors of a rabbit. 11. The longer, coarser hairs that extend above the undercoat are called. A. Crimp hair B. Guard hairs 12. Rabbits with this condition will have their head thrown back with open mouth breathing A. Coccidiosis B. Ear canker C. Heat Stress 13. Most of the digestion process takes place in the A. Small intestine B. Stomach C. Large intestine	
A. Warmer B. Colder 10. is a written chart of the ancestors of a rabbit. 11. The longer, coarser hairs that extend above the undercoat are called. A. Crimp hair B. Guard hairs C. Stray hairs 12. Rabbits with this condition will have their head thrown back with open mouth breathing A. Coccidiosis B. Ear canker C. Heat Stress 13. Most of the digestion process takes place in the A. Small intestine B. Stomach C. Large intestine	
 is a written chart of the ancestors of a rabbit. The longer, coarser hairs that extend above the undercoat are called. A. Crimp hair B. Guard hairs C. Stray hairs Rabbits with this condition will have their head thrown back with open mouth breathing A. Coccidiosis B. Ear canker C. Heat Stress Most of the digestion process takes place in the A. Small intestine B. Stomach C. Large intestine 	
 The longer, coarser hairs that extend above the undercoat are called. A. Crimp hair B. Guard hairs C. Stray hairs Rabbits with this condition will have their head thrown back with open mouth breathing 	
A. Crimp hair B. Guard hairs C. Stray hairs 12. Rabbits with this condition will have their head thrown back with open mouth breathing A. Coccidiosis B. Ear canker C. Heat Stress 13. Most of the digestion process takes place in the A. Small intestine B. Stomach C. Large intestine	
A. Crimp hair B. Guard hairs C. Stray hairs 12. Rabbits with this condition will have their head thrown back with open mouth breathing A. Coccidiosis B. Ear canker C. Heat Stress 13. Most of the digestion process takes place in the A. Small intestine B. Stomach C. Large intestine	
A. CoccidiosisB. Ear cankerC. Heat Stress13.Most of the digestion process takes place in the A. Small intestineB. StomachC. Large intestine	
A. CoccidiosisB. Ear cankerC. Heat Stress13.Most of the digestion process takes place in the A. Small intestineB. StomachC. Large intestine	
A. Small intestine B. Stomach C. Large intestine	•
A. Small intestine B. Stomach C. Large intestine	
14. A rabbit has a total of premolars.	
15. A coat that is shedding or molting a profusion of hairs is called	
A. Molting B. Loose coat C. Slipping coat	
16fur has long, wool-type fibers that are collected and spun in	to yarı
17 Discharge and matted fur at medial corner and under the lower evolid is called	
 Discharge and matted fur at medial corner and under the lower eyelid is called. A. Sniffles B. Sore eye C. Weepy eye 	

18.	According to the A.B.R.A., which meat class has rabbits that must be 6 months and over and a minimum weight over 8 lbs?					
	A. Roaster	B. Fryer	C. Stewer			
19.	What household chemical	should be used to clear	n your crocks?			
20.	•	the 18 th and 22 nd day af B. Palpitation	ter mating, what does this indicate? C. Kindling			
21.	According to A.R.B.A. stan weight of 3lbs. & not over		s has rabbits not over 10 weeks old & minimum			
	A. Roasters	B. Fryers	C. Stewers			
22.	In the rabbit's skeletal syst	em, there are	different bones.			
	A. 45	B. 23	C. 32			
23.	If the fur just below the ey	e is wet & matted, the	rabbit may have			
	A. Conjunctivitis	B. Mastitis	C. Metritis			
24.	You should palpate your d	oe	days after mating.			
	A. 10	B. 14	C. 18			
25.	Handling rabbits when it is	hot can cause				
	-	B. Molting – Mites				
26.	Using	will help remove calc	ium deposits from rabbits' cages.			
	A. Bleach	B. Alcohol	C. Vinegar			
27. Rabbits have a normal pulse rate within what range?						
	A. 100 – 110	B. 120 – 130	C. 140 - 150			
28.	A lack of water causes		food intake.			
	A. Increased	B. Decreased				
29.	The condition of fur lacking	g density in the underco	bat is called			
	A. Molting	B. Loose coat	C. Slipping coat			
30.		is a bacterial infectio	n in the upper respiratory system.			
	A. Mastitis	B. Snuffles	C. Weepy eye			
31.	According to A.R.B.A. Standards, which meat class has rabbits under 6 months old, & a minimum weight over 5 lbs. & not over 8 lbs?					
	A. Roasters	B. Fryers	C. Stewers			
32.	A. Kindling	is a method of check B. Palpating	ing by touch whether or not your doe is pregnant. C. Gestation			
	, , , , , , , , , , , , , , , , , , ,	5. rapating				
33.			e to health, cleanliness, fur, & grooming.			
	A. Prime	B. Coat	C. Condition			
34.	The A.R.B.A. recognizes fo					
	A. True	B. False				

35.	Different breeds have different posing positions.
	A. True B. False
36.	After kindling, the first milk is higher in lactose and fat. What is it called?
	A. Colostrum B. Lactolostrum C. Enfamil
37.	is a bacterial infection in the mammary gland.
071	A. Mastitis B. Wry neck C. Coprophagy
38.	When a rabbit turns its head to the side & has a loss of balance, this could indicate what?
	A. Ear mites B. Weepy eye C. Wry neck
39.	Black oil sunflower seeds are a good source of
	A. Fat - Fiber B. Protein - Vitamins C. Salt - Oil
40.	What is the body part that is the curved portions of the sides immediately back & under the shoulders?
41.	A yellowish white discharge from a doe's vent, you would suspect what disease?
	A. Mastitis B. Metritis C. Coccidiosis
42.	What rabbit condition has several names, including blue bag & caked udder?A. EnteritisB. MetritisC. Mastitis
43.	For best protection from the weather, what direction should you face your cages?
44.	fur is very dense, & guard hairs are nearly the same length, giving a
	velvet-like feeling.
45.	A rabbit has a total of incisors.
46.	Butting teeth is a form of malocclusion.
	A. True B. False
47.	Name the body part of the joint that attaches the hind legs to the trunk of the body.
48.	The temperature in the hutch should not be higher than
	A. 87°F B. 85°F C. 84°F
49.	What percent of crude protein should be in a dry does feed?
	A. 12% - 15% B. 16% - 20% C. 18% - 20%
50.	Name the four accepted eye colors for rabbits.

13-14 year old Rabbit Showmanship Answer Key

1.	A.	True	26.	C.	Vinegar		
2.	A.	Peg teeth	27.	C.	140 -150		
3.	A.	Foot	28.	В.	Decreased		
4.	A.	Coprophagy	29.	В.	Loose coat		
5.	В.	Variety	30.	В.	Sniffles		
6.	C.	5	31.	A.	Roasters		
7.	В.	102°F - 103°F	32.	В.	Palpating		
8.	В.	60%	33.	C.	Condition		
9.	В.	Colder	34.	A.	True		
10.	Peo	ligree	35.	A.	True		
11.	В.	Guard hairs	36.	A.	Colostrum		
12.	C.	Heat stress	37.	A.	Mastitis		
13.	A.	Small intestine	38.	C.	Wry neck		
14.	10		39.	A.	Fat - Fiber		
15.	C.	Slipping coat	40.	Rib	S		
16.	. Angora		41.	В.	Metritis		
17.	C.	Weepy eye	42.	C.	Mastitis		
18.	C.	Stewer	43.	South			
19.	Ble	ach	44.	Re	Rex		
20.	A.	Pseudopregnancy	45.	6			
21.	B.	Fryer	46.	A.	True		
22.	В.	23	47.	Нір			
23.	A.	Conjunctivitis	48.	B. 85			
24.	В.	14 days	49.	129	12% -15%		
25.	A.	Stress - Heat stroke	50.	Blu	e, Pink, Brown, Blue Gray
