

# WAYNE COUNTY ANNUAL REPORT 2024

33030 Van Born, Wayne, MI 48184 | (734) 721-6576

With the Support of Warren C. Evans, Wayne County Executive and Wayne County Commissioners

## Message from the District Director

The 2024 programming year was a productive year for MSU Extension. Our staff continued the work of bringing a wide variety of programs to the residents of Wayne County. During this reporting year we increased our community partnerships to more effectively deliver Extension

programs to a broader number of community-based organizations. However, because of challenges with our U.S. Forestry Service partner, our overall program reach decreased during this reporting period. We also saw a modest decline in our Master Gardener efforts.

MSU Extension continued to create more programs and opportunities for learning while fostering public interests in healthy lifestyles, child development, homeownership and money management, cultivating sustainable agriculture and building a strong future for our youth. Our MSU Product Center innovation staff member supported 120 clients and generated more than 1,000 hours of counseling individuals in starting, managing, and growing food-based businesses in Wayne County. Her efforts informed individuals as they made strategic decisions about the use of their personal resources as they pursued their passion in entrepreneurship.

United States Representative Rashida Tlaib visits a class at Snow Elementary in Dearborn with an MSU Extension community nutrition instructor to see MSU Extension programs in action as well as to learn more about how our programs impact our communities. (Photo credit: MSU Extension)

The staff at MSU Extension is dedicated to maintaining a viable connection within our community and we are grateful for the support from local volunteers, supporters, and our partners within Wayne County government.

## Overall Impact

**25** community coalitions in Wayne County included MSU Extension staff members.

**22,540** participants from the county attended programs.

**1,603** programs (across the state) attended by participants from Wayne county.

**29,264,562** contacts through social media, web activity, e-newsletters, and handouts.

**54** Nutrition and Physical Activity Policy System and Environmental sites receiving PSE education within the county.

**108** policy, systems, and environmental changes with those PSE sites. **8,045** participants were impacted positively by these changes.

**1,142** client consultation hours.

Counseled **120** food-based businesses.

Jodi Schulz, Co-Director, MSU Extension Children & Youth Institute, State Representative Reggie Miller, and Dr. Quentin Tyler, Director of Michigan State University Extension proudly display the new Michigan 4-H license plate that debuted in 2024. Available at the Michigan Secretary of State, the plate prominently displays the signature 4-H clover and part of the proceeds from every sale and renewal will go to support Michigan 4-H youth. (Photo credit: MSU Extension)

## Economic Development, Environmental Conservation, and Agricultural Productivity

**67,320** participants in community, food, and environment programs from across Michigan.

**470** virtual programs related to Financial Education, Food Systems, Water and Environmental Quality, Government and Businesses.

**781** participants from Wayne County participated in horticulture programs.

**\$246.5 billion** of annual impact of food and agriculture on Michigan's economy.

# Program Descriptions

- **Nutrition and Physical Activity Education** are a means to prevent obesity and decrease chronic diseases among residents. We deliver high-quality, no-cost education to serve the needs of low-income adults, children, families, and senior citizens through fun, interactive classes.
- **Food Safety** classes teach participants how to reduce chances of foodborne illness; information about the MI Cottage Food Law; how to preserve food by water-bath canning, pressure canning, freezing or drying using researched based information and safe techniques; classes on food safety related to emergency preparedness and clean drinking water; and classes for participants to earn their ServSafe® Manager Certification.
- **Money Management and Financial Literacy** programs provide sessions that focus on helping consumers gain confidence and skills related to their personal finances. Participants attend classes to understand their money values; how to communicate about money; how to develop spending plans; SMART goals; manage debt; improve credit and how to create plans for saving and investing.
- **Social-Emotional Health and Well-being** programs strive to increase personal competencies such as emotional resilience, self-esteem and interpersonal skills. These skills help to protect against risks relating to exposure to toxic stress stemming from social and economic disadvantage, poor parenting, abuse, family disruption, relationship violence and other adversities in life. Our programs target people who are at risk for a wide range of physical, psychological, social, emotional, cognitive, financial and spiritual health challenges.
- **Early Childhood Education** programming is designed to increase the knowledge of the basic concepts of early childhood development, including how to keep children socially, emotionally and physically safe as well as the techniques that support school readiness and academic success.
- **MSU Detroit Partnership for Food, Learning and Innovation (DPFLI)** focuses on programs and research that support urban agriculture through fruit crop management, food systems education and food preservation. The center also provides neighborhood-based Extension programs in Northwest Detroit.
- **MSU Extension 4-H** programs allow youth participants to learn life skills that prepare them for the workforce – especially for highly sought after jobs in science, technology, engineering and mathematics (STEM). Extension programs help children develop early literacy skills that support school readiness. Participating youth learn leadership and decision-making skills in 4-H that will increase their likelihood of becoming civically active.
- **MSU Extension Michigan Sea Grant** facilitates or assists with numerous projects in Wayne County including Aquatic Invasive Species Education, which centers on education and outreach programs at various locations throughout the county. Safe & Sustainable Fisheries – workshops that are intended to bring together anglers with fisheries managers and other subject matter experts to provide information about the status and trends of fishing in the Great Lakes and connecting waters. Also, Harmful Algal Bloom Education providing annual webinars about how to recognize, report, and stay safe around blooms.
- **Consumer Horticulture** serves home-gardeners, community gardens, non-profits, and community groups, seeking information to improve gardening practices. To become a **Certified Extension Master Gardener**, trainees must first complete the “Foundations of Gardening” ten-week class to learn about horticulture and research-based practices, volunteer onboarding and 40 hours of educationally focused volunteer service to the community.

# Program Highlights

## Native Plants for Michigan Gardeners

Last March, an MSU Extension Consumer Horticulture Educator (CHE) held a one-day presentation at the Plymouth District Library. The presentation was called “Native Plants for Michigan Gardeners” and was meant for local homeowners. In this presentation, she explained what defines a “native plant” and how these plants can enhance home gardens by adding beauty and supporting wildlife. Drawing from her own home garden and the Smart Habitat Garden at the Western Wayne office, the CHE highlighted species native to Wayne County and discussed key design considerations. She explained that many insects have evolved to feed exclusively on native plants, making them essential for a thriving ecosystem. For example, monarch butterfly caterpillars can only consume milkweed—without it, monarchs would vanish. Another example is songbirds depending on insects to feed their young. Native plants are so important because without them we would not have as many insects, which would mean that there would not be as many birds. This presentation brought in over 20 participants, many of whom were beginners in planting and they left feeling well informed and ready to add to their existing gardens.

## Providing Quality Programming for Everyone

Academy of the Americas in Detroit—a school composed primarily of Spanish-speaking students—partnered with a MSU Extension 4-H Program Instructor (4-H PI) to bring teen Mental Health First Aid (tMHFA) programming to their school.

For many teens, managing mental health and well-being can be challenging. At Academy of the Americas, students face additional layers of complexity as immigrants or children of immigrants from Spanish-speaking countries, often navigating cultural, linguistic and emotional hurdles alongside typical adolescent pressures.

When the school initially reached out, the National Council for Mental Wellbeing did not offer a Spanish translation of the teen Mental Health First Aid curriculum. After persistent dialogue and advocacy, the Council ultimately developed and released a Spanish-language version of the program.

The 4-H Program Instructor played a key role in this effort—working diligently to secure the translated curriculum and laying the groundwork to successfully implement teen Mental Health First Aid for Spanish-speaking students. Thanks to this commitment, Academy of the Americas is now equipped to provide culturally and linguistically relevant mental health education for years to come.
